

## Allowing Location Services – iPhone

When downloading the Safety Notice app on an iPhone, you need to allow Safety Notice to access your location so the app can send a GPS signal to loved one's followers.

Below is the method for turning that service on:

### Step 1

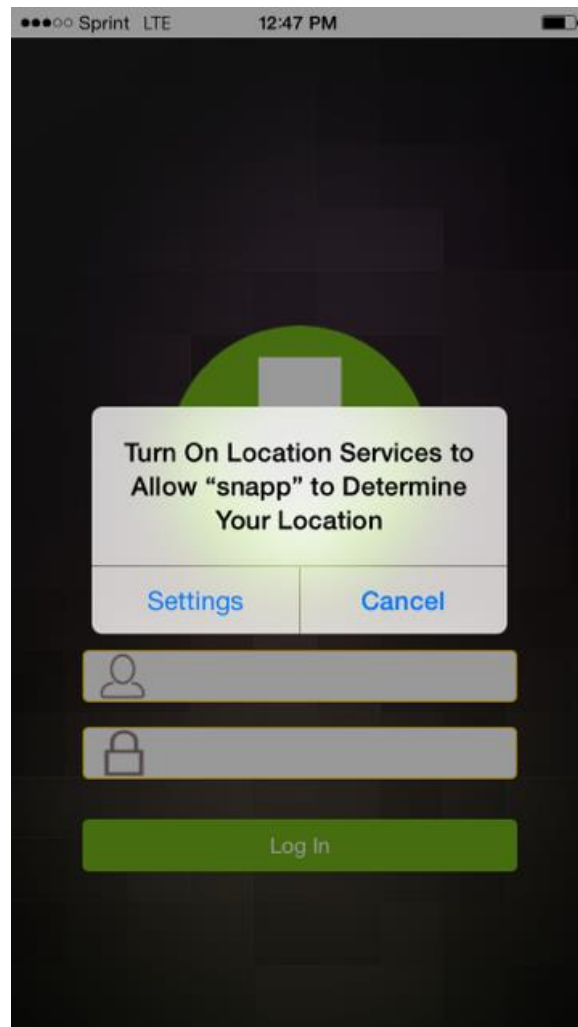

Download the Safety Notice app from the iTunes store (Figure 1).

(Figure 1)

## Step 2

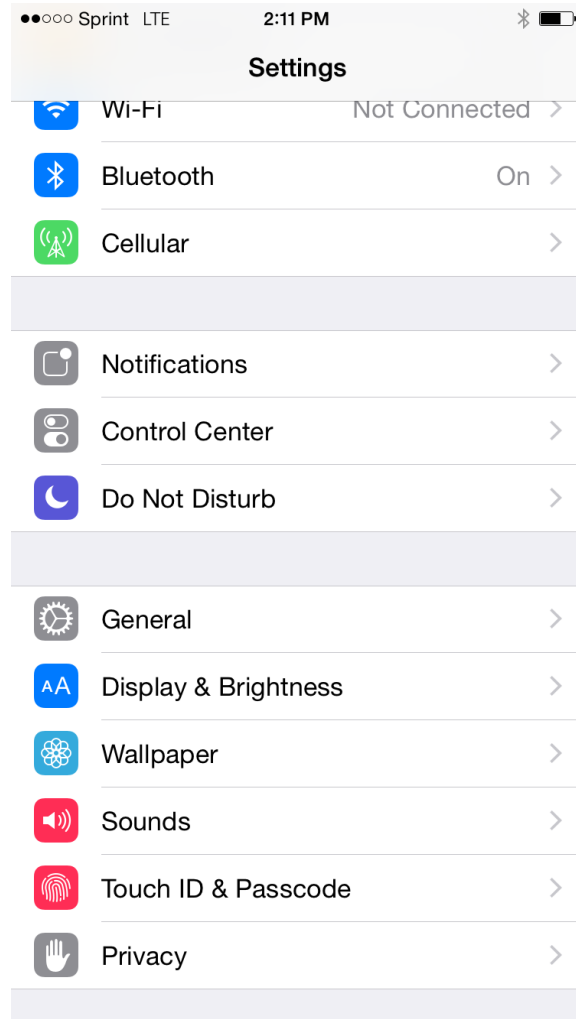

When you open the app for the first time, you will receive a popup saying, “Turn On Location Services to Allow “snapp” to Determine Your Location” (Figure 2). Select the “Settings” button. This will take you directly to the section of your iPhone/iPad Settings pertaining to Location Services, and you can skip to Step 5. *If you pressed “Cancel” during your original sign in and now you’re trying to turn the Location Settings on, move to Step 3.*

(Figure 2)

### **Step 3**

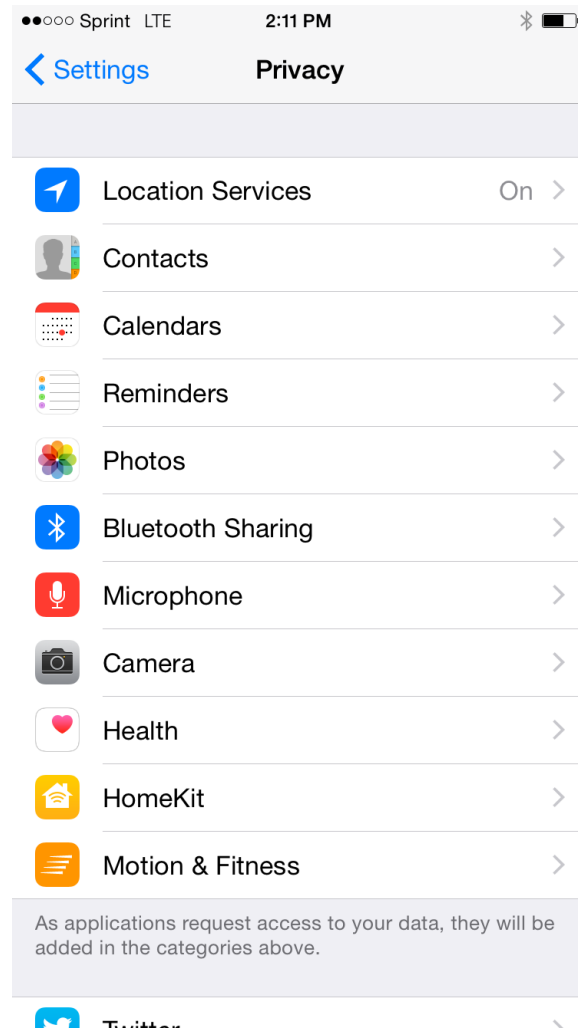

Go to your iPhone's "Settings" app. Scroll down to the "Privacy" option (Figure 3).

(Figure 3)

#### **Step 4**

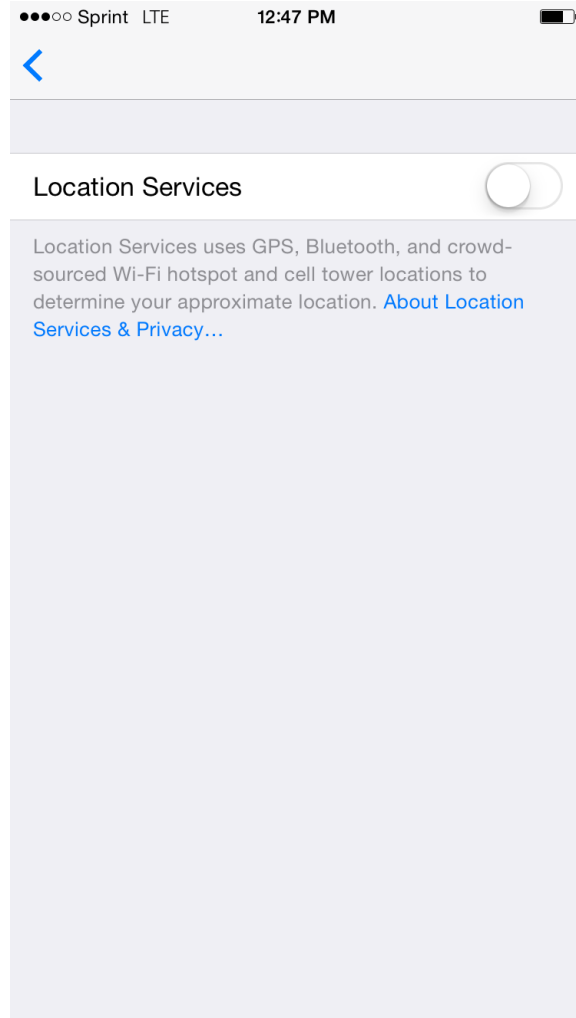

Select “Location Services” (Figure 4).

(Figure 4)

### **Step 5**

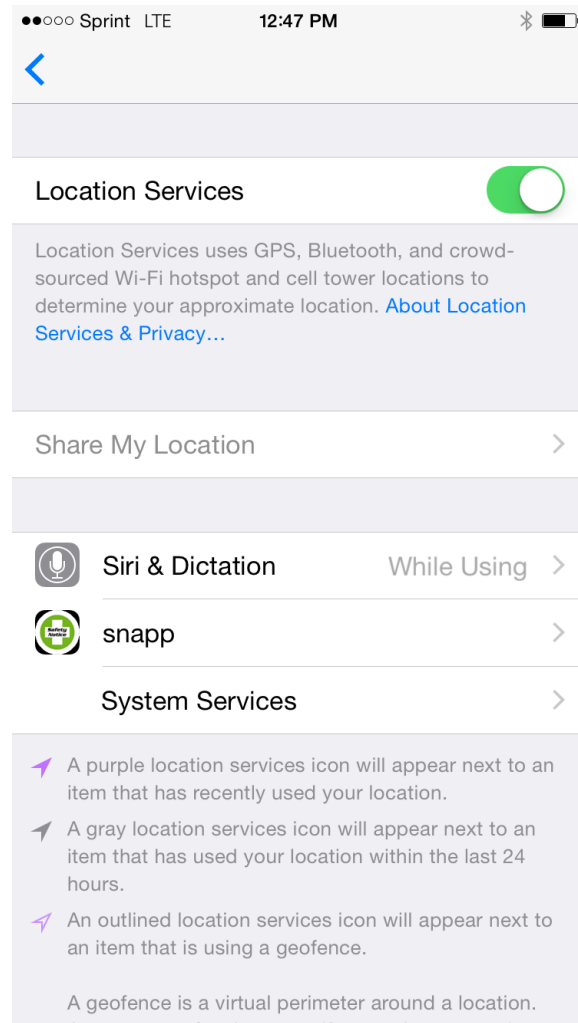

Once in Location Services, you will notice that the toggle switch is either off (Figure 5) or on (Figure 6). If the toggle switch is off, slide it on.

(Figure 5)

### Step 5 (cont'd)

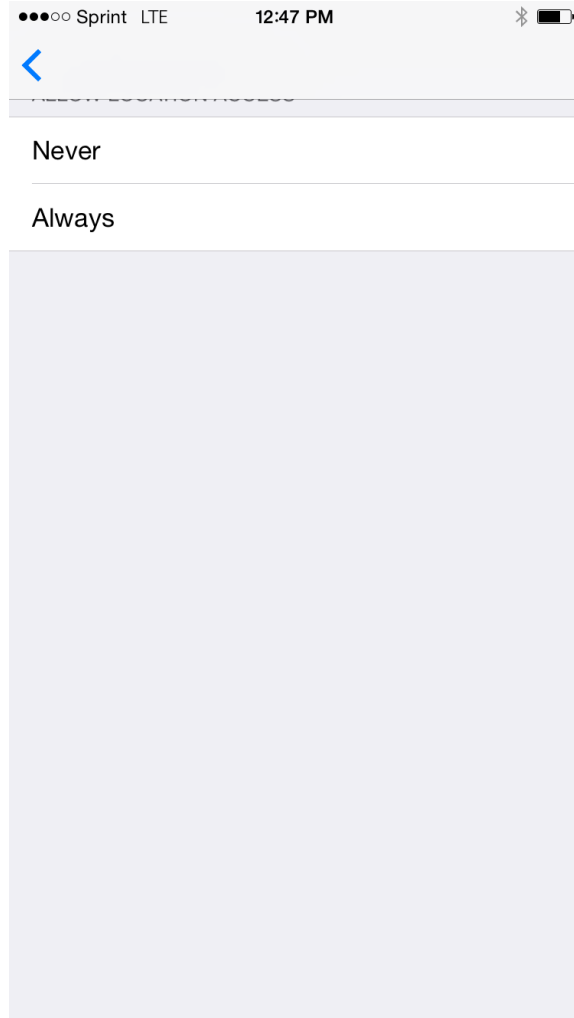

When the toggle switch is turned on, it will appear green (Figure 6). Below the Location Services switch is a list of apps that are GPS capable. Choose “snapp” or scroll down your app list to locate it and then select it.

(Figure 6)

### **Step 6**

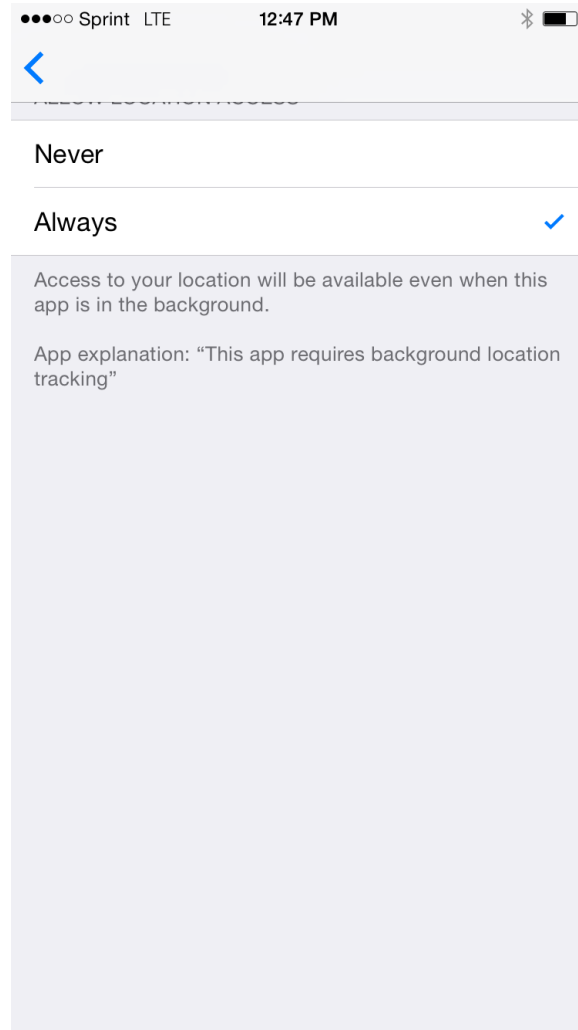

You should see two choices for the “snapp” location services: “Never” and “Always” (Figure 7). Choose “Always.”

(Figure 7)

### Step 6 (cont'd)

Once you select “Always,” a check will appear next to it (Figure 8).

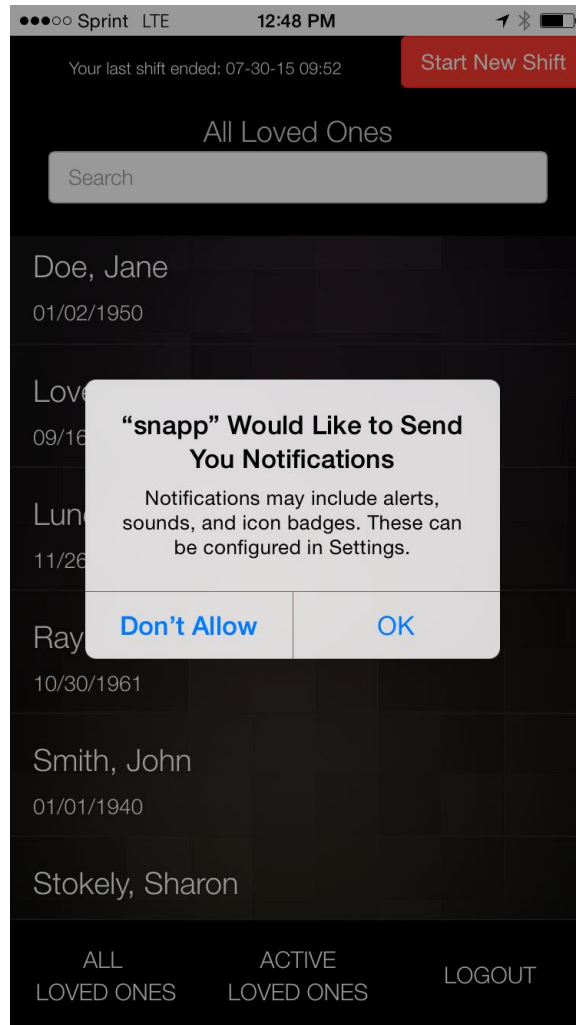

(Figure 8)

### Step 7:

You're ready to open the Safety Notice app and sign in with your Username and Password. Once you sign in, you will receive a popup saying "'snapp' Would Like to Send You Notifications" (Figure 9). Select "OK" to make sure you get notifications. This is important in situations when you forget to press the "Departure" button after interacting with a loved one.
